- Worked with multiple programming languages, frameworks and technologies.
- Learnt how to operate in a team and how to collaborate with my classmates to complete demanding projects.

PROJECTS

I have created multiple projects in the past and I'm always working on something new. A lot of my projects are full CRUD applications that demonstrate my ability of working with multiple technologies, utilizing external APIs, creating APIs, managing requests asynchronously and handling a database. Each project includes a detailed documentation and is deployed online and ready to be viewed live. You can find most of my work on my Github page(github.com/ArmantoArisRoutsis) and on my Portfolio Website under the work section(routsis-armanto.web.app).
